Write a 1–2-page double spaced essay discussing why you chose to join the Honors Program at MNSU. How do you want your experience at MNSU to be impacted by your participation in honors? How do you want your participation in honors to help you grow personally and professionally?

I chose to join the Honors program at Minnesota State University, Mankato because of many reasons. The first reason is that I have read the benefits and privileges I would get in participating in such interesting program from different platforms and Alumni around me. I read that the program provides access to the resources and facilities of the university as well as helps me to use my maximum potential on the major I'm taking. The second reason is I got accepted to the program directly while most students don't even get this opportunity so I planned to use it!

I guess I will have the chance to know the University well & have more memorable experiences than the students that aren't participating in this program. I want to meet more peoples, develop my social skills and also want to learn different things from my fellow honors students. Additionally I think I will

get used to attending special programs and events unlike other non-honor program students. Overall I will expect a very enjoyable years ahead!

I hope this program will help me grow both my personal as well as my profession skills. It will guide me in growing to become a well-rounded individual with the ability in leadership, research, critical thinking, professional and social skills. And I believe it will also help me to be good at managing time, which is the key factor of most successful people on Earth.
